

Making the world safer, one app at a time.

We provide a range of mobile app security solutions from scanning your app for potential issues, to full code audits and ongoing security analysis.

OPTION 1

Audit an existing app and present our findings on how it should be fixed so it's more secure.

OPTION 2

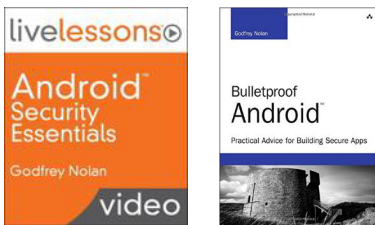

Ongoing auditing of iOS and Android apps. We offer this third party service to our clients. We can either audit existing apps on the app store or audit the app before they are released to the iTunes or Google Play.

OPTION 3

Onsite training, 1-week training using the Bulletproof Android book as a guide but tailored to your app. Followed up by a mix of onsite and offsite coaching.

OPTION 4

Video training and books

About RIIS LLC

RIIS is a Michigan-based IT services provider that partners with organizations needing consulting or development expertise to deliver customizable solutions with real business value. RIIS specializes in mobile & web application development, Agile project management, custom software development and website performance enhancements. Expertise on application security comes from the top down, as RIIS Founder and President, Godfrey Nolan has authored BulletProof Android (Pearson, 2014) and Decompiling Android (Apress, 2012). Learn more about RIIS and Code Audit Services at riis.com.

Support matrix
– iOS 5.1+
– Android 2.2+

“RIIS helped us to secure our iPhone, iPad, Android and Windows apps. RIIS was able to quickly identify gaps in the protection of our applications, determine the potential risks, and recommend the necessary code adjustment to ensure the security of our moviegoer destination apps.”

– IT Director
